

**Reilhofer KG** has been a specialist in acoustic early stage damage detection and end-of-line quality assurance in the automotive sector for over 30 years. Our diagnostic systems are used in component testing and in engine and transmission tests, especially for the development and production of electric drives and hybrids. Our measuring systems are an integral part of test benches for the entire powertrain in development and production worldwide.

For the area of customer care and sales, we are looking for someone who will take on the following position as soon as possible:

### Application and Project Engineer

#### Your tasks:

- Technical consulting and support for our acoustic diagnostic systems for existing customers worldwide
- International (pre)sale of our diagnostic systems and subsequent project management during the sales and installation process
- Installation of the measuring devices at the customer and service when used on site
- Making new customer contacts, follow ups and support
- Planning and holding customer trainings
- Support of our customers in analyzing and evaluating diagnostic data obtained (by telephone, remote or at the customer's site)
- Participation in international trade fairs and specialist events

#### Your profile:

- Completed technical university studies (e.g. as a mechatronics technician, electronics technician, vehicle technician, mechanical engineer, engineer) or comparable technical education with professional experience
- First successful professional experience in a customer-oriented task
- Knowledge of conventional and alternative automotive technologies
- Good understanding of electronic systems / circuits
- Ideally, experience in the sale of explanatory technical products
- Very good written and spoken English knowledge
- Willingness to take business trips
- Independent, goal-oriented and structured way of working
- Strong contact, customer and success-oriented personality

Excellent performance can only be achieved in a positive working atmosphere. That is why human cooperation, respect, honesty and openness are the top priorities at Reilhofer KG. We create freedom based on trust in everyday work, team events, open doors and also fun at work. We equip our employees well for their tasks (e.g. company vehicle, smart phone, laptop) and take time for intensive training. We celebrate successes together. Our field of work is automobiles. This will continue to be one of the most interesting business areas in the future. Are you interested in being one of those who will grow with and in this fast-growing future market? Then please send us your detailed application documents by email to [jobs@rhf.de](mailto:jobs@rhf.de).
