Software Developer – Desktop (m/f/d)

Workplace:

Munich Region - The workplace is located at our headquarters in Dachau, Germany. After a successful training period home office will be an option.

Reilhofer KG

As an owner-managed company, we have been a successful, recognized partner of the automotive industry for over 30 years. Our innovative, state-of-the-art NVH diagnostic systems for early damage detectionand line quality control in powertrain production prove themselves every day in worldwide use by our customers (OEMs, Tier 1 suppliers, research institutes and service providers). Continuous improvement and regular investments in the future, through constant in-house development of new hardware and software, are integral components of our success.

Summary of the position:

To strengthen our development team, we are looking for a highly motivated professional or graduate.

Our desktop software aims to generate easy-to-understand statements about the quality status of the test specimen from the data provided by the hardware.

Togetherwith your colleagues in software development, you will work on a new, modular softwaregeneration. Their work spans the entire development process, starting from new ideas to their implementation as a reusable functional module. You are in constant contact with your colleagues in software and hardware development.

Big data and AI are just as important here as the development of efficient algorithms and an intuitive UI.

We are looking for you, be a part of our team.

Have we piqued your interest?
We would be happy if you feel like it,
to support our team in the following tasks in the future:

- Collaboration in the planning , project planning, development and commissioning of the software for our diagnostic systems
- Creation of solution concepts and functional specifications
- Execution of in-house system tests
- Continuous development of our software
- Independent implementation of individual components within an agile development team

Software Developer – Desktop (m/f/d)

If you have the following qualities and talents:

- A degree in IT or an apprenticeship as an IT specialist or a comparable qualification
- Experience in software development with C#, .NET, Visual Studio
- Experience with Git as version control
- Experience in UI design with WPF
- Knowledge in the area of SQL database systems desirable
- Willingness to familiarize yourself with new topics
- Good knowledge of English, both written and spoken
- Confident handling of MS Office applications
- Independent, target-oriented, and structured way of working
- Willingness to make occasional business trips

Then we have for you

An attractive salary package, professional development opportunities and a dynamic work environment that values innovation and collaboration.

A modern office and good workplace equipment, as well as a well-founded familiarization with our subject area is a matter of course for us.

Are you interested in working in this fast-growing future market?
Then please send us your application documents by e-mail to
